

PART II: Final Report for Fiscal Years 2000-2004

(8) Juvenile Justice Transfers

**Children's Administration
Department of Social and Health Services**

Final Report for FY 00-04: Juvenile Justice Transfers

Children's Administration pulled data from our Case and Management Information System (CAMIS) on children who experienced a Juvenile Rehabilitation placement as the last event of FFY03, and whose cases were closed as "transfer of custody." There were only 2 such children, both Caucasian males.

			Male	
Hispanic	Race Grp	Age @ JREvtStrt	Number	Percent
Not Hispanic	Caucasian	(c) 16-18 Yrs	1	50.00%
	Caucasian Total		1	50.00%
Not Hispanic Total			1	50.00%
Unreported	Caucasian	(b) 11-15 Yrs	1	50.00%
	Caucasian Total		1	50.00%
Unreported Total			1	50.00%
Grand Total			2	100.00%

While transfer of custody is rare, CAMIS lists Juvenile Rehabilitation events for 173 children who were in out of home care during FFY 03. The table on the following page presents that information, noting age at the start of the earliest Juvenile Rehabilitation event, race, and gender.

Thirty-nine of the 173 children had more than one Juvenile Rehabilitation event during FFY 03. Some data confusion for the 173 cases exists, since 23 of the 173 children reflect a legal status other than dependency (e.g., shelter care, voluntary placement) and 13 indicate dependency status prior to the FFY 03 episode start, but no dependency, shelter care or voluntary placement status during the episode.

**Children in Out of Home Care with CA and Juvenile
Rehabilitation Events FFY 03**
